

Living Water Smart, BC's Water Plan

Asset Management for Sustainable Drainage Service Delivery

Water Balance Accounting

for land draining into streams

Water Balance Methodology

(WBM) views drainage analysis thru a "water cycle lens" to assess Changes in Hydrology outside the Natural Commons Asset

Asset Management links the two

Ecological Accounting

for land within regulated stream setback zone

Ecological Accounting Process

(EAP) views financial analysis thru a "social lens" to assess the Riparian Deficit within the Natural Commons Asset

Hydrology is the Engine that Powers Ecological Services

the partnership
for water sustainability in bc
