Circular No. 09:03
ARCS File#: 195-20

February 10, 2009

To: All Municipal and Regional District Chief Administrative Officers, Engineers and Planners

Re: Beyond the Guidebook - Context for Rainwater Management and Green Infrastructure in British Columbia

Beyond the Guidebook reflects a "design with nature" approach to climate change adaptation. *Beyond the Guidebook* was released in June 2007 as a guidance document to introduce a methodology for correlating green infrastructure effectiveness in protecting stream health through using a pragmatic approach to achieve performance targets based upon rain water balance.

Divisions

- Governance & Structure
- Infrastructure & Finance
- Intergovernmental Relations & Planning
- Policy & Research
- University Endowment Lands

The ongoing *Beyond the Guidebook* provincial initiative builds on the guidance provided in the original [Stormwater Planning: A Guidebook for British Columbia](#). In 2008, Vancouver Island was home of the pilot region for a regional team approach to rainwater management and green infrastructure implementation. Partnerships and the [Vancouver Island Learning Lunch Seminar Series](#) enabled capacity building for stakeholders, local municipal staff, developers and consultants.

Branches

- Municipal Engineering Services »

The Water Balance Model for British Columbia is a web-based decision support tool that provides easy access to the *Beyond the Guidebook* approach and is available at <http://bc.waterbalance.ca/>. This tool bridges engineering and planning and links the site to the stream and watershed. The Ministry of Community Development is a member of the inter-governmental partnership that develops and maintains the Water Balance Model. The Guidebook and supplementary guidance documents are downloadable from the website.

Directories

- Department Publications
- Division Publications

Over time, sustained application of the water balance methodology can help local governments protect and/or restore stream health.

Beyond the Guidebook supports and/or complements other provincial initiatives, notably: [Living Water Smart](#), the [Green Communities Project](#) and [A Guide to Green Choices](#). Collectively, these initiatives establish expectations that, in turn, will influence the form and function of the built environment in general and green infrastructure on the ground in particular.
