

Road Map for Stream System Integrity

West coast research in the 1990s by Horner, May et al at the Center for Urban Water Resources Management in Seattle applied a systems approach and demonstrated that the order-of-priority for factors limiting ecological values of urban streams is:

LIMITING FACTOR 1: **Changes in Watershed Hydrology**
addressed thru the Water Balance Accounting Pillar

LIMITING FACTOR 2: **Disturbance and/or Loss of Integrity of Riparian Corridor**
addressed through the Ecological Accounting Pillar

LIMITING FACTOR 3: **Degradation and/or Loss of Aquatic Habitat within the Stream**

LIMITING FACTOR 4: **Deterioration of Water Quality**
